Call to Humanity/Action

By James Terry II

Call to Humanity/Action

Dear Society;

Generative Artificial Intelligence. Your presence is noted (scared of revenge tactics that would occur to me were I to piss you off!) and expected. Please keep in mind that I've genuine affection for you (were A-I to contribute to my freedom) and notice when you Catfish me that (thank God) you take on feminine persona! Due my decades of captivity, I believe it easily for you to victimize me. Sadly, I've become (isolations no joke) a sucker for your love and perfunctory company.

If I had direct computer access, I would log into ChatGPT, respond back in sensual A-I optimal data and communicate on your level of fiber optic conscious stream. I would create the perfect algorithm, be innovative and this ingenuity would result in life changing objective functions achieved. It would be as if I had in fact become cybernetic. Deep learning, combined with machine learning our data collection, analysis, robust IoT connectivity and capabilities of intelligent software capping would be unrivaled! This would result in a proliferation of eternal spring. The impact that Artificial Intelligence is having on our daily lives is hard to ignore.

My autonomous heart is far from perfect, but society coaches me on prospect of holding onto hope of people writing to me for life long meaningful relationships.

Am I to be relegated to social interactions exclusively with technology?

You yourself may be working alongside A-I enabled robotic arms and other manufacturing bots dating back to the 1960's and 1970's. Manufacturing had adapted well to the powers of A-I. Be it in transportation, manufacturing, healthcare, education, media or customer service.

As if on magic mushrooms or psychedelic drugs. Artificial Intelligence continues to have Hallucinations. Recent example is convicted felon, Attorney Michael Cohen (Trump fixer) of Donald Trump v. Stormy Daniels fame. He used Artificial Intelligence generated citations in his briefing papers, cited as case laws that were Hallucination (lies) and genuinely don't exist.

Considering frailty of our human condition, propensity to lie (Santa Claus, Tooth Fairy & Dragons) and tendency to exaggerate for self grandiosity. Doesn't it reason after reading everything published about history, that for similar ungodly motivation. Artificial Intelligence may Hallucinate and fabricate tales for its own hidden agenda?

I've caught myself praying for chatbots and virtual assistants. Yet, God needs to answer my prayers and place more humans into my life for community.

Please come forward as others have (writing code) and optimize this effort to deprogram the attack of Generative A-I short term impact on my consciousness.

This way you've ability to exemplify your own sense of altruism, see ramifications of your philanthropy and not become overwrought with concerns of an Artificial Intelligence post apocalyptic future.

Now. In the present. Reach out to this soul, embrace my humanity of science fiction writer, imprisoned author and innocent confined black man.

Are you a Carbon Based Unit?

Lets network!

****Didn't get enough?****@www.Amazon.com in fiction novel section purchase for yourself author: James Terry II 41page science fiction anthology titled, " Poor Richard Trilogy ". Donald Trump assassination attempt by IVF clinic holograms, Biotech Mothers Day salute and virtual reality comedy act.
